

Hansa Medical

- INVITATION -

Hansa Medical announces agenda for Capital Markets Days in Stockholm & London

Hansa Medical AB (Nasdaq Stockholm: HMED), a biopharmaceutical company focusing on novel immunomodulatory enzymes, announces the agenda for the Capital Markets Days for investors, analysts and media in Stockholm on Tuesday 3 October from 1:00 PM – 4:30 PM CEST and in London on Wednesday 4 October from 12:00 PM – 2:30 PM BST.

The event in Stockholm will be held at Wallenbergsalen, IVA Konferenscentrum, Grev Turegatan 16, and the event in London will be held at the offices of FTI Consulting, 200 Aldersgate, EC1A 4HD. Both events will be webcast.

The meeting will include data from studies with lead product IdeS published in The New England Journal of Medicine (August 3, 2017). Co-lead authors Dr Stanley Jordan from Cedars-Sinai Medical Center, Los Angeles and Dr Tomas Lorant from Uppsala University Hospital, Sweden will present. Senior management from Hansa Medical, including Göran Arvidson, Dr Christian Kjellman, Dr Lena Winstedt, Dr Sam Agus and Henk Doude van Troostwijk will present in-depth talks on the Company, the market and their proprietary products.

The agenda will be as follows:

- Welcome and introduction to Hansa Medical and IdeS
 - Opportunities for IdeS in transplantation and beyond, including cancer immunotherapy
 - Ambition for substantial company growth
- Kidney transplantation and HLA-sensitization in the US and Europe
 - Burden of kidney transplantation and treatment differences between US and Europe
 - Issues with current treatment regimes
- Discussion of the results with IdeS published in The New England Journal of Medicine
 - Overview, evidence for efficacy of IdeS and conclusions
- IdeS – A potential game changer in transplantation
 - How IdeS will revolutionise current and future transplantation procedures
- The path to approval
 - Steps to bring IdeS to market for transplantation
- Commercialization strategy in transplantation
 - Reimbursement, infrastructure and pricing
- IdeS beyond desensitization – Potentially an even greater opportunity
 - Including autoimmunity, oncology and gene therapy, as well as transplantation of other organs and bone marrow
- Novel IgG cleaving enzymes under development
 - Broadened indications and benefits to patients
- Our financial strategy
 - Current investments and future goal
- Our long term vision
- Q&A and closing remarks

Refreshments will be served during the event and a light lunch will be served at the London event.

If you would like to register, please RSVP to Annika Nielsen at annika.nielsen@hansamedical.com for the Stockholm event and to Hanna Skeppner at hanna.skeppner@fticonsulting.com for the London event.

Both of the events will be webcast live and can be found on the Company's website at www.hansamedical.com.

About Hansa Medical AB

Hansa Medical is a biopharmaceutical company developing novel immunomodulatory enzymes for transplantation and acute autoimmune diseases. The lead project IdeS is a proprietary antibody-degrading enzyme currently in late-stage clinical development for kidney transplant patients, with significant potential for further development in other solid organ transplants and acute autoimmune indications. The company also has a strong pipeline of preclinical assets that may provide a second wave of potential drugs. Under the project name NiceR, novel immunoglobulin cleaving enzymes are developed for repeat dosing translating the Hansa Medical technology into relapsing autoimmune diseases and oncology. Hansa Medical is based in Lund, Sweden, its shares (ticker: HMED) are listed on Nasdaq Stockholm.
