

# hansa medical

## Year-End Release 2007

*Hansa Medical refines biomedical discoveries into candidate drugs and diagnostic analytical methods. The company's long-term goal is to bring new products to market through collaboration agreements with pharmaceutical and diagnostics companies. Hansa Medical's lead project, IdeS, is an innovative drug for treatment in conjunction with organ transplantation and autoimmune disease. The company also pursues other development projects, including diagnostics and drugs for sepsis. Hansa Medical has about 600 shareholders and has been listed on First North, part of the OMX Nordic Exchange Stockholm, since October 2007. Kaupthing Bank is the certified advisor.*

*This document is a summary of the full Swedish report. For a full account of the company's operations, refer to the Swedish report.*

## CEO's comments – focus on IdeS and alpha-11

“For Hansa Medical, 2007 was an eventful year. Following a fully subscribed new share issue and a company's subsequent introduction on First North, we are now an independent biotechnology company with tangible and goal oriented development projects. On completion of the share issue, we immediately commenced our clinical development plan for IdeS.”

“We achieved key development goals primarily relating to our lead projects IdeS and HMD-301 for the diagnosis and prognosis of sepsis. During 2007, Hansa Medical successfully established links with researchers with strong focus on patient benefits, as well as commercially minded employees with medical expertise.” *Emanuel Björne, CEO Hansa Medical AB (publ)*
